**Cost efficiency of banks in transition: Evidence from 289 banks in 15 post-communist countries**

To understand the transformation of banking in the post-communist transition, this paper examines the cost efficiency of 289 banks in 15 east European countries. The findings showed that banking systems in which foreign-owned banks have a larger share of total assets record lower costs and that the association between a country's progress in banking reform and cost efficiency is non-linear. Steven Fries and Anita Taci.
