Introduction

In this the 2010 and 34th edition of 'Europe's 15,000 Largest Companies' the data has been updated through local research or by the companies themselves, whom we wish to thank for their cooperation. It is our hope to provide valuable financial and marketing data on the major public and private companies in Europe.

CD-ROM accompaniment

Europe's 15,000 Largest Companies now include an accompanying CD-ROM offering all the information included in the book. The CD-ROM is designed to be a cost-effective marketing tool, providing unlimited access to company contact details. The names and addresses can be downloaded and used as often as you wish – there are no additional charges once you have purchased the book.

How to use

The basis of this publication is a list of the top companies in Europe ranked by turnover. The information is organised on a country by country basis. In addition there are ranking lists for the 500 largest companies by turnover, profits and employees and for the 100 largest companies in major industry categories.

For each company we provide the following information:

Rank — indicates comparative size within the table. Where available change from last year's position is also provided.

Country Codes — appear after each country in the table of contents.

Industry Activity Code — a full list of SIC codes is given on pages *xi-xix*.

The company main industry sector, industry activity codes and financial data are given within the rankings.

Alphabetical Index — The alphabetical index includes country codes and ranking of each company thereby making it possible to find the company easily in the appropriate country section. The index contains full contact details including: address, city with postal code, telephone, fax, and where available website addresses and email. Also included in the index is the contact name as provided of the company's most senior executive.

Trade Index — The Trade Index is organised by Standard Industrial Classification (SIC) using the first two numbers of the code which identify the broad industrial sector. Companies are then organised alphabetically within the sections.

Definitions

Sales	Net sales including service and rental revenue but excluding Value Added Tax.
Profit	Net profit after taxes and dividends. Losses are indicated by a minus sign.
Assets	Total assets employed in the company at its year end.
Year of Founding	The year that the operations undertaken by the business were first started. Not necessarily the date that the business was registered or incorporated.
Change in Control	The year that current ownership took control of the company.
Employees	Average number of employees for the year.

NOTE FROM THE PUBLISHERS

We are now gathering new data and information for the 2011 edition of 'EUROPE'S 15,000 LARGEST COMPANIES' and would appreciate hearing from, or of, companies not included in the present edition.

Whilst we use our best efforts in the preparation of the material for inclusion in 'EUROPE'S 15,000 LARGEST COMPANIES', we do not assume, and hereby disclaim any liability to any party for loss or damage caused through errors or omissions in the publication whether these errors or omissions result from accident, negligence or any other cause.

Aerospace & Electronics (The 100 largest companies)

Aérospatiale et Electronique (Les 100 premières sociétés)

Luft- und Raumfahrt und Elektronik (Die 100 größten Unternehmen)
